

## Andron Handling Ltd

### Vacancies for Assembly and Installation Technicians

Andron Handling designs, builds and installs bespoke equipment for automotive and aerospace customers in the UK.

We are currently recruiting for experienced Assembly and Installation Technicians.

Working closely with prestigious customers including Jaguar Land Rover and Rolls Royce, you will be assembling and installing a range of custom designed specialist machinery.

Candidates should understand and have experience of mechanical assembly, have excellent attention to detail and the initiative to solve problems and work to achieve solutions. You are also required to have a full driving licence and be available for evening and weekend work, for which generous overtime rates are offered.

Candidates must be flexible, hardworking and trustworthy to represent the company unsupervised on installation visits.

#### Essential experience

- Mechanical Assembly & Fitting of small bespoke equipment
- Ability to read, understand and assemble from engineering drawings
- Time management and organisational skills/able to work unsupervised
- Articulate, good communication skills and team working ability
- Flexible and able to prioritise

#### Preferred experience

- Qualifications in engineering
- Pneumatic, hydraulic or electronic control systems
- Licensed for forklift and MEWP use

Andron are keen to encourage staff to develop their skills and are willing to provide opportunities for career progression and formal study.

Salary range: £11 to £15 per hour dependent on qualifications and experience.

If you are interested please send an email with your up to date CV to [careers@andronhandling.com](mailto:careers@andronhandling.com) with the job title in the subject line.

No agencies please.
