

Andron Handling Ltd

Vacancy for Design Engineer

Andron Handling designs, builds and installs bespoke equipment for automotive and aerospace customers in the UK. We are expanding and are currently recruiting an experienced Design Engineer to work from our Head office in Marlow, Bucks.

Working closely with prestigious customers such as Jaguar Land Rover and Rolls Royce, you will be designing bespoke special purpose equipment.

Candidates will need the ability to work unsupervised, in a fast paced environment so that completion dates are achieved and our customers' expectations are exceeded.

Essential requirements

- Educated to degree level or equivalent in Mechanical Engineering
- Experience of designing bespoke special purpose equipment
- Experience producing detailed manufacturing drawings and technical information
- Robust problem solving skills
- Excellent time management and organisational skills
- Ability to provide technical, innovative solutions
- IT proficient
- Ability to work well with others
- Clear written and verbal communication skills

Preferred requirements

- Experience of working with Solidworks, or a similar 3D CAD package
- Design experience in the automotive/aerospace industry

Salary range: £30,000 - £40,000 per annum dependent on qualifications and experience.

If you are interested please send an email with your up to date CV to careers@andronhandling.com with the job title in the subject line.

No agencies please.
