

## Andron Handling Ltd

### Vacancy for Project Engineer

Andron Handling designs, builds and installs bespoke equipment for automotive and aerospace customers in the UK. We are expanding so are currently recruiting an experienced Project Engineer to work from our Head office in Marlow, Bucks.

Working closely with prestigious customers such as Jaguar Land Rover and Rolls Royce, you will manage the design, manufacture, installation and commissioning of bespoke special purpose equipment to meet planned completion dates.

Candidates will need the ability to take ownership of and proactively manage each project so that completion dates are achieved and our customers' expectations are exceeded.

#### Essential requirements

- Robust problem solving skills
- Educated to degree level or equivalent in Mechanical Engineering
- Experience of managing multiple projects concurrently through all project stages from project launch to customer signoff
- Ability to maintain and grow solid client relationships
- Excellent time management and organisational skills
- Ability to provide technical solutions
- IT proficient
- Ability to work well with others

#### Preferred requirements

- Experience in projects involving the design and installation of bespoke special purpose machinery

Salary range £35,000 to £55,000 dependant on skills and experience.

If you are interested please send an email with your up to date CV to [careers@andronhandling.com](mailto:careers@andronhandling.com) with the job title in the subject line.

No agencies please.
